

SCHUMACHER

Electric ProSeries DSR141 12V Jump Starter

For automotive professionals looking for a simple, high-output jump pack.

APPLICATION

The ProSeries DSR141 12V Jump Starter is designed for professional technicians in the automotive industry looking for a simple, high-output, heavy duty jump pack.

ORIGIN

The DSR141 was developed for technicians in need of a simple, yet heavy duty professional jump pack for all applications.

FEATURES AND BENEFITS

- Digital display indicates the percent of charge or the voltage and percentage of the jump starter's internal battery.
- Reverse connection alarm will sound if clips have been connected backwards.

SELLING POINTS

- Offers 500 cranking amps, 2,000 peak amps, and 325 cold cranking amps for 12V batteries.
- Includes strong, bonded metal clamps.
- Comes with one external 2A automatic charger designed to stay plugged in when not in use.

The **Schumacher Electric ProSeries DSR141 12V Jump Starter** features a basic design, making it easy to use. The jump starter provides up to 2,000 peak amps, 500 cranking amps, and 325 cold cranking amps for 12V batteries. It features a digital display, 12V DC power outlet, and comes with a 2A automatic charger. With the new case design, metal clamps, and improved, high-output AGM battery, this long-lasting and durable jump starter is ideal for professionals.

Includes strong, bonded metal clamps.

STORAGE AND DISPLAY

The DSR141 is shipped in a box. The company suggests displaying the jump pack out of its package for show.

MANUFACTURING SPECS

The product is manufactured in Mexico.
